know about their smile*

Where Creativity Meets Artistry

"I Can't believe that this is a Dental Office," exclaim patients as they first enter the new Las Colinas office of Dr. Jerry Dunn. Dr. Dunn's wife, Connie, is an ASID interior designer and has created a tropical oasis reminiscent of the British colonial style. Comfortable chairs, a stone fireplace and flat screen television stand ready to pamper patients. Hand-

etched glass panels which feature swaying palms, a 14-foot-wide hand-painted mural of a beach scene add to the exotic flavor. Large beams with bamboo panels and a chandelier accented with playful monkeys complete

the island feel. Three years in the planning and design process have resulted in an office that has been featured in Doctor of Dentistry Magazine as one of the most outstanding offices anywhere. Other Dentists have visited the office from several states and foreign countries to admire its design.

Can grinding molar crowns be strong and natural looking?

One of the most innovative products at Advanced Dental Care is the new Lava Crown. They are metal free - which is important for patients who have metal sensitivity.

They also are 100% biocompatible and are the only restoration in the mouth that does not break down from the acids in the oral cavity. The Lava crowns are made from Zirconia porcelain used in hip replacements for over 20 years. They are incredibly strong - and yet completely natural looking.

Spa Treatment. Dr. Dunn and his staff have created an atmosphere more like a spa than a

dental office. They have everything from personalized music, aromatherapy, chenille blankets, candles and warm towels. They even provide hand and foot massage for patients getting longer procedures. Some rooms have bird feeders to add additional serenity. Patients are even offered nitrous oxide to help them relax. These services are a gift to their patients and are offered at no additional charge.

Smile Makeovers are not new to us. Over 20 years ago Dr. Dunn was creating smile makeovers with bonding materials that thrilled his patients. Those cases seem antiquated now, with the advances of all porcelain veneers and crowns. Many of the original makeover patients are now updating their smiles to the more natural-looking thin white glossy porcelain.

Kristen Shouse, Practice Director, says that Dr. Dunn's natural skills, love of dentistry, and his commitment to always being on the cutting-edge have rewarded his patients with some of the most beautiful smiles anywhere. Through the use of digital photography and imaging software, a patient can see what their smile would look like before beginning the smile makeover. He loves to show off his extensive library of before and after smiles and has many patients who can be contacted with any questions you might have.

Sterilization and New Technology. Dr. Dunn is proud of his large well-equipped sterilization area that is open in the center of the office for all patients to see. He utilizes digital x-rays that afford the patient instant, very low-dosage images. He offers the Wand for virtually painless anesthetic, and ZOOM for in-office whitening.

Insurance Welcomed. One of the additional services offered is determining what insurance benefits a patient has and how they can be utilized to reduce the out-of-pocket dental expenses. Advanced Dental Care accepts most dental insurance and there's also extended payment options available.
